You may be one of the 80% lucky people who achieve their goals and these methods are what you need: phishing, also known as phishing

The use of spyware Divination (yes, you read that right but everything lies in the interpretation) Don-t worry, here are the explanations.

1. The phishing method consists of creating a page with almost the same content as the target page (here it is the FACEBOOK account). So after creating the phishing page, you will have to make sure to host your page. providers of free hosting accounts: ooowebhost, hostinger, wix, etc. Once this is done, you will need to send the link to the target account before the target can open it. (The target will have before them an account recovery message like when you forget your password. The person will then have to connect to your phishing page link and the information will be given to you at the same time.
2. Spyware is not missing. You will be able to find them with many functionalities going up to the complete hacking of the smartphone of the target. Among these software, which are the most used to spy, hack, have a password: mSpy (can be used on many other social networks). Spyzie (allows remote spying and the famous smartphone hack) fbrripper (specially designed to hack an FACEBOOK account) Note that this method is expensive to pay, but the features are "worth it" if you can put it that way.
